

How to View Your eLearning on Your iPad

Easy, Step-by-Step Instructions

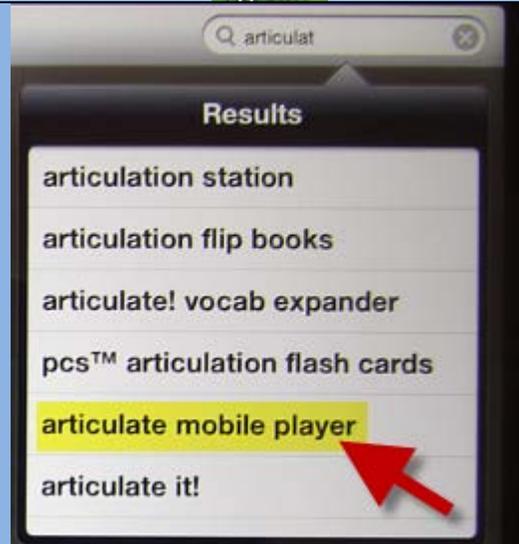

DOWNLOADING THE ARTICULATE MOBILE PLAYER

The steps on this page show you how to download the Articulate Mobile Player, which is the recommended way to view your eLearning content on your iPad. It's a free, quick download from the iTunes App Store, and you only need to download it once.

On your iPad, tap the **App Store** icon.

In the Search window, type **Articulate Mobile Player**. Once you see it listed, tap that item to select it.

Tap the **Install** button for the Articulate Mobile Player.

Enter your **Apple ID** if prompted, and tap **OK**. (You won't see this if you've already downloaded another app during that same App Store session.)

When the installation is done, you'll see the Articulate icon. (If it's not on your first iPad screen, remember that you can swipe left to see any other screens you've created for your icons; the icon will be on one of them.)

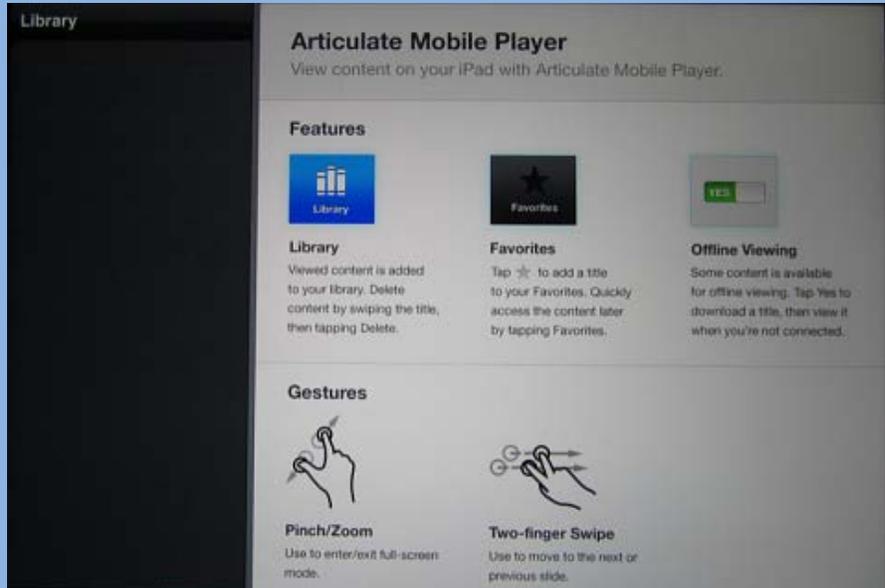

DOWNLOADING AND LAUNCHING YOUR COURSE

Once you have the Articulate Mobile Player installed on your iPad, follow these steps any time you want to download and launch one of your eLearning courses.

Tap the Articulate icon on your iPad to open the Articulate Mobile Player. The Player *must be open* before you open the course.

The first time you open the Player (or any time you don't have any content in your Library), you will see the Help screen that shows you basic information about how to use the Player. Take a moment to review it, and note that you will have the option to download some courses to review them offline on your iPad. (Instructions for deleting it afterward are below.)

Leaving the Player *open*, tap your iPad's **Home** button to return to your main iPad screen.

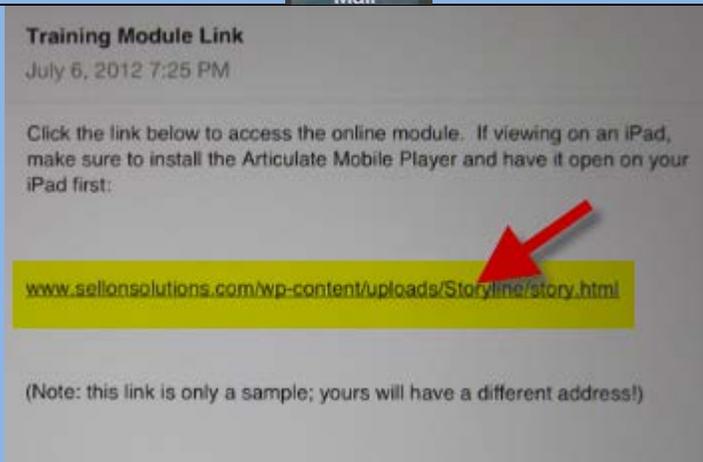

Open your e-mail app by tapping its **Mail** icon.

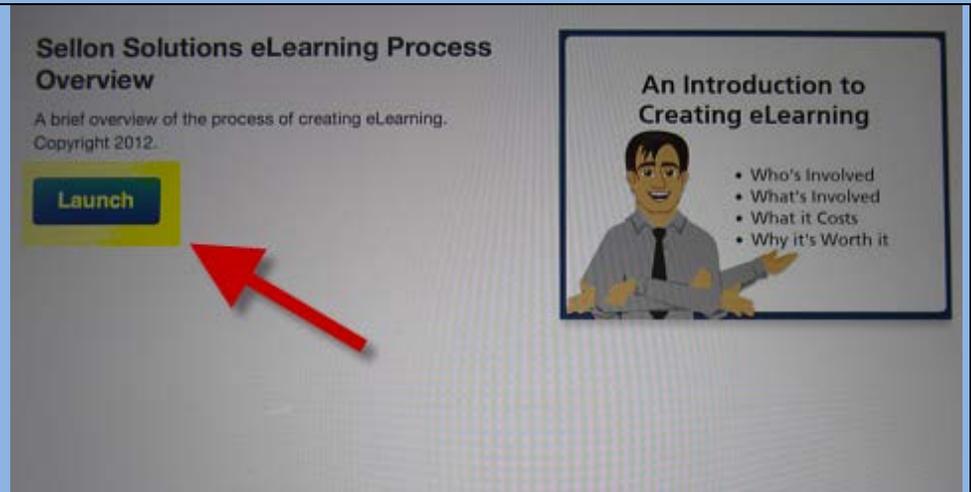

Locate the e-mail you were sent that contains the link to the online course, and tap the **URL link** provided.

REMINDER: YOU MUST HAVE THE ARTICULATE MOBILE PLAYER OPEN BEFORE LAUNCHING THE COURSE SO THAT IT GOES INTO YOUR PLAYER'S LIBRARY.

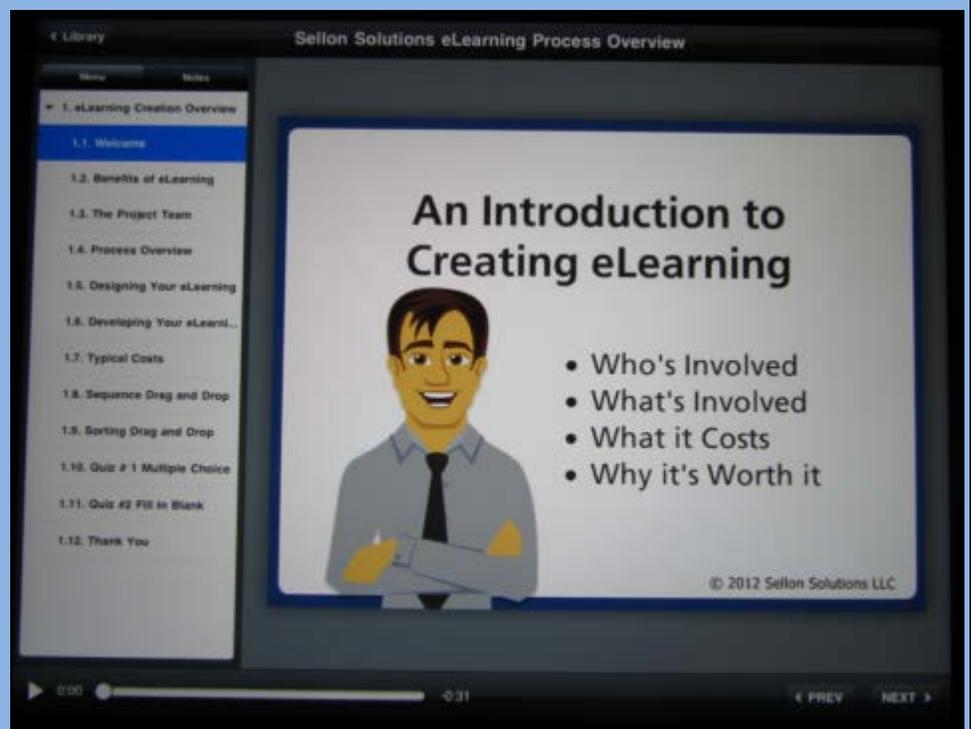

Your iPad's Safari browser will open. Double-check if necessary to ensure that your Articulate Mobile Player is still open as well. Then, tap the **Launch** button to load the course into your Player.

Provided you kept the Player open, the course will now open automatically in the Player (rather than your Safari browser, which would not render the course content as smoothly).

You can now take your course online from your iPad using the Player. The experience will be virtually identical to taking it on a laptop, except that you will not see rewind or mute buttons. We recommend that you always listen to any audio included with a course. If you need to adjust the volume or mute it, you can use the buttons on the right side of your iPad.

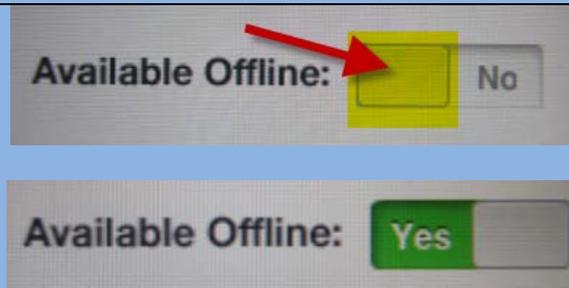

If you'd like to save your course to your iPad so that you can view it *offline* at your convenience, tap the **Library** button in the upper right corner of the Player frame.

TIP: It's a great way to view the course while commuting (with earphones!).

On the Player's main Library screen, locate the "Available Offline:" slider in the upper right corner of the frame, and use your finger to slide the gray square over the "No" to reveal the green "Yes" instead.

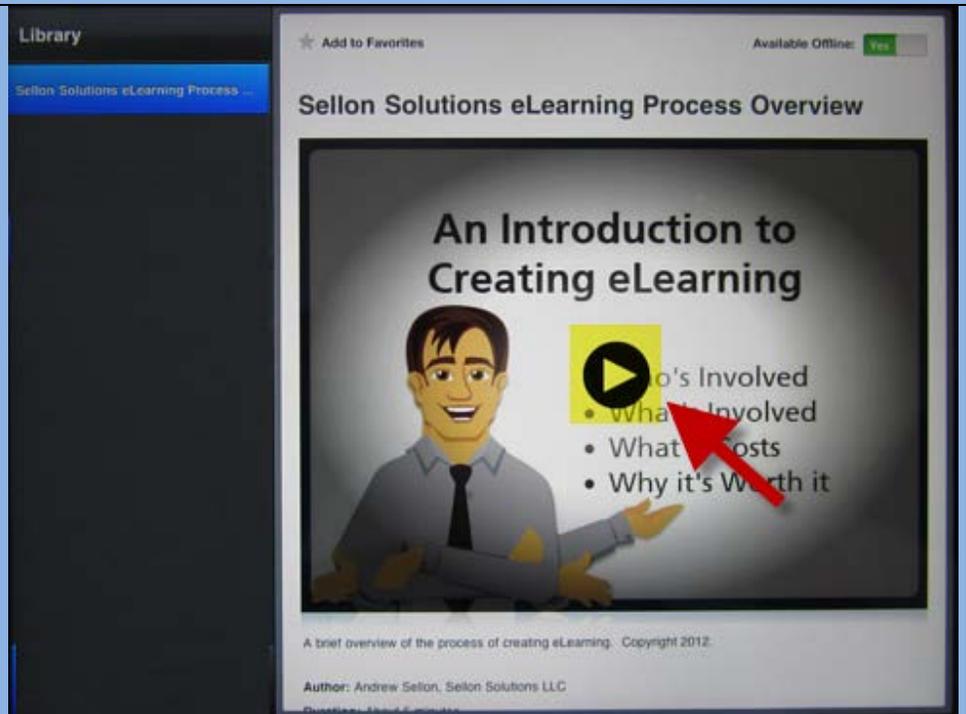

The course will now download to your iPad for offline viewing. Once the message reads "Download Complete" you can tap the **Continue** button to view the course offline.

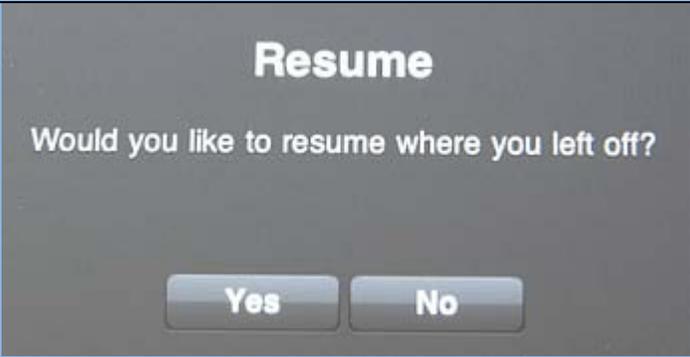

TIP: If at any point you are notified that the course has been updated, you can move the slider back to show "No" and then back to "Yes" again while connected to the internet or network, and the latest version of the course will download.

Once you've downloaded a course for offline viewing, from the Player's home page, tap the course name on the left menu to highlight it, then tap the **Play** button to start the course.

If you aren't able to finish the course in one sitting, no problem. The next time you open the Mobile Player, you'll see a prompt asking whether you'd like to resume where you left off. Tap "Yes" to resume, or "No" to return to the beginning of the course.

To delete a course from your Player Library (and from your iPad), simply use your finger to swipe the menu item left, and then tap the **Delete** button that appears next to the item you wish to remove. You can download the course again at a later date, if needed, provided the link is still available.
